REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claims 1-7 and 15-20 address x-ray tube target angle heel effect compensation where a filter is used to correct uniformity of at least one of projection noise and spatial resolution, claim 8 addresses an imaging system with a non-stationary filter between the source and detector such that different detector rows are filtered differently based on detector row, and claims 9-14 address an imaging system where a filter is used to correct uniformity of at least one of projection noise and spatial resolution as a function of target angle along the z-axis. These features are neither shown nor fairly suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toth *et al.* US 2005/0058254 A1 appears to be related to the present application and shows different heel effect compensation.
